

S/N 09/712,064

Response to Office Action Dated 04/01/2004

AMENDMENTS**In the Claims**

Please add new claims to the present application as set forth below. A detailed listing of all claims has been provided. A status identifier is provided for each claim in a parenthetical expression following each claim number.

Claims 1—90 were originally filed.

Claims 16—30, 46—60 and 76—90 were previously cancelled.

Claims 91—109 were previously presented.

Accordingly, claims 1—15, 31—45, 61—75 and 91—109 are pending.

1. (Original.) In a computer system having a graphical user interface including a display and a user interface selection device, a method of maintaining a single window interface, comprising:

receiving a request to open a second browser window while a first browser window is displayed;

ignoring the request if the request was not initiated in response to a user action; and

opening the second browser window if the request was initiated in response to a user action.

2. (Original.) The method of claim 1, further comprising opening the second browser window as a full-screen browser window if the request was initiated by a user action.

3. (Original.) The method of claim 2, further comprising superimposing the full-screen browser window on the first browser window.

S/N 09/712,064

Response to Office Action Dated 04/01/2004

1 4. (Original.) The method of claim 1, further comprising opening the
2 second browser window after receiving a load finished event for the first browser
3 window and before receiving an unload event for the first browser window.

4 5. (Original.) The method of claim 1, further comprising opening the
5 second browser window in a second browser instance distinct from a first browser
6 instance in which the first browser window is opened.

7 6. (Original.) The method of claim 5, further comprising modifying
8 the content of one of the first and second browser windows in response to an event
9 occurring in one of the first and second browser instances.

10 7. (Original.) The method of claim 1, wherein the first browser
11 window contains a plurality of frames, wherein the request to open a second
12 browser window is associated with one of the plurality of frames, and wherein the
13 method further comprises opening the second browser window after loading the
14 frame associated with the request to open the second browser window.

15 8. (Original.) The method of claim 7, further comprising opening the
16 second browser window after loading all of the frames of the first browser
17 window.

18 9. (Original.) The method of claim 1, further comprising suppressing a
19 request to open a dialog box until a browser window associated with the request to
20 open the dialog box is displayed.

21 10. (Original.) The method of claim 1, further comprising suppressing
22 generation of a sound associated with a browser window that is not displayed.
23
24
25

S/N 09/712,064

Response to Office Action Dated 04/01/2004

11. (Original.) The method of claim 1, further comprising:

receiving a request to close a browser window;

closing the browser window if another browser window is open; and

ignoring the request if no other browser window is open.

12. (Original.) The method of claim 1, further comprising maintaining, in a browser history, a history of transitions between the first and second browser windows.

13. (Original.) The method of claim 12, further comprising building the browser history from a history of a displayed browser window.

14. (Original.) The method of claim 12, further comprising building the browser history from histories of a set of simultaneously open browser windows.

15. (Original.) The method of claim 12, further comprising:
detecting, in the browser history, a transition between two simultaneously open browser windows; and

in response to the detected transition, hiding one of the first and second browser windows and displaying a different one of the first and second browser windows.

Claims 16—30 (canceled)

S/N 09/712,064

Response to Office Action Dated 04/01/2004

1 31. (Original.) A computer-readable medium having stored thereon
2 computer-executable modules comprising a browser module, configured to:

3 receive a request to open a second browser window while a first browser
4 window is displayed;

5 ignore the request if the request was not initiated in response to a user
6 action; and

7 open the second browser window if the request was initiated in response to
8 a user action.

9 32. (Original.) The computer-readable medium of claim 31, wherein the
10 browser module is further configured to open the second browser window as a
11 full-screen browser window if the request was initiated by a user action.

12 33. (Original.) The computer-readable medium of claim 32, wherein the
13 browser module is further configured to superimpose the full-screen browser
14 window on the first browser window.

15 34. (Original.) The computer-readable medium of claim 31, wherein the
16 browser module is further configured to open the second browser window after
17 receiving a load finished event for the first browser window and before receiving
18 an unload event for the first browser window.

19 35. (Original.) The computer-readable medium of claim 31, wherein the
20 browser module is further configured to open the second browser window in a
21 second browser instance distinct from a first browser instance in which the first
22 browser window is opened.
23
24
25

S/N 09/712,064

Response to Office Action Dated 04/01/2004

1 36. (Original.) The computer-readable medium of claim 35, wherein the
2 browser module is further configured to communicate information between the
3 first and second browser windows in response to an event occurring in one of the
4 first and second browser instances.

5 37. (Original.) The computer-readable medium of claim 31, wherein the
6 first browser window contains a plurality of frames, wherein the request to open a
7 second browser window is associated with one of the plurality of frames, and
8 wherein the browser module is further configured to open the second browser
9 window after loading the frame associated with the request to open the second
10 browser window.

11 38. (Original.) The computer-readable medium of claim 37, wherein the
12 browser module is further configured to open the second browser window after
13 loading all of the frames of the first browser window.

14 39. (Original.) The computer-readable medium of claim 31, wherein the
15 browser module is further configured to suppress a request to open a dialog box
16 until a browser window associated with the request to open the dialog box is
17 displayed.

18 40. (Original.) The computer-readable medium of claim 31, wherein the
19 browser module is further configured to suppress generation of a sound associated
20 with a browser window that is not displayed.

S/N 09/712,064

Response to Office Action Dated 04/01/2004

1 41. (Original.) The computer-readable medium of claim 31, wherein the
2 browser module is further configured to:

3 receive a request to close a browser window;

4 close the browser window if another browser window is open; and

5 ignore the request if no other browser window is open.

6 42. (Original.) The computer-readable medium of claim 31, wherein the
7 browser module is further configured to maintain, in a browser history, a history
8 of transitions between the first and second browser windows.

9 43. (Original.) The computer-readable medium of claim 42, wherein the
10 browser module is further configured to build the browser history from a history
11 of a displayed browser window.

12 44. (Original.) The computer-readable medium of claim 42, wherein the
13 browser module is further configured to build the browser history from histories of
14 simultaneously open browser windows.

15 45. (Original.) The computer-readable medium of claim 42, wherein the
16 browser module is further configured to:

17 detect, in the browser history, a transition between two simultaneously open
18 browser windows; and

19 in response to the detected transition, hide one of the first and second
20 browser windows and displaying a different one of the first and second browser
21 windows.

22
23 Claims 46—60 (canceled)

S/N 09/712,064

Response to Office Action Dated 04/01/2004

- 1 61. (Original.) A computer system, comprising:
2 a graphical user interface including a display and a user interface
3 selection device; and
4 a browser module, configured to
5 receive a request to open a second browser window while a first
6 browser window is displayed,
7 ignore the request if the request was not initiated in response to a
8 user action, and
9 open the second browser window if the request was initiated in
10 response to a user action.
- 11 62. (Original.) The computer system of claim 61, wherein the browser
12 module is further configured to open the second browser window as a full-screen
13 browser window if the request was initiated by a user action.
- 14 63. (Original.) The computer system of claim 62, wherein the browser
15 module is further configured to superimpose the full-screen browser window on
16 the first browser window.
- 17 64. (Original.) The computer system of claim 61, wherein the browser
18 module is further configured to open the second browser window after receiving a
19 load finished event for the first browser window and before receiving an unload
20 event for the first browser window.
- 21 65. (Original.) The computer system of claim 61, wherein the browser
22 module is further configured to open the second browser window in a second
23 browser instance distinct from a first browser instance in which the first browser
24 window is opened.

5
66. (Original.) The computer system of claim 65, wherein the browser module is further configured to communicate information between the first and second browser windows in response to an event occurring in one of the first and second browser instances.

7
8
9
10
11
67. (Original.) The computer system of claim 61, wherein the first browser window contains a plurality of frames, wherein the request to open a second browser window is associated with one of the plurality of frames, and wherein the browser module is further configured to open the second browser window after loading the frame associated with the request to open the second browser window.

12
13
14
68. (Original.) The computer system of claim 67, wherein the browser module is further configured to open the second browser window after loading all of the frames of the first browser window.

15
16
17
69. (Original.) The computer system of claim 61, wherein the browser module is further configured to suppress a request to open a dialog box until a browser window associated with the request to open the dialog box is displayed.

18
19
20
21
22
23
24
25
70. (Original.) The computer system of claim 61, wherein the browser module is further configured to suppress generation of a sound associated with a browser window that is not displayed.

S/N 09/712,064

Response to Office Action Dated 04/01/2004

1 71. (Original.) The computer system of claim 61, wherein the browser
2 module is further configured to:

3 receive a request to close a browser window;
4 close the browser window if another browser window is open; and
5 ignore the request if no other browser window is open.

6 72. (Original.) The computer system of claim 61, wherein the browser
7 module is further configured to maintain, in a browser history, a history of
8 transitions between a set of simultaneously open browser windows.

9 73. (Original.) The computer system of claim 72, wherein the browser
10 module is further configured to build the browser history from a history of a
11 displayed browser window.

12 74. (Original.) The computer system of claim 72, wherein the browser
13 module is further configured to build the browser history from histories of the set
14 of simultaneously open browser windows.

15 75. (Original.) The computer system of claim 72, wherein the browser
16 module is further configured to:

17 detect, in the browser history, a transition between simultaneously open
18 browser windows; and

19 in response to the detected transition, hide one of the first and second
20 browser windows and displaying a different one of the first and second browser
21 windows.

22
23 Claims 76—90 (canceled)

S/N 09/712,064

Response to Office Action Dated 04/01/2004

1 91. (Previously Presented.) A computer system having a user interface
2 configured to maintain a single window interface, comprising:

3 means for receiving a request to open a second browser window while a
4 first browser window is displayed;

5 means for ignoring the request if the request was not initiated in response to
6 a user action; and

7 means for opening the second browser window if the request was initiated
8 in response to a user action.

9 92. (Previously Presented.) The computer system of claim 91, further
10 comprising means for opening the second browser window as a full-screen
11 browser window if the request was initiated by a user action.

12 93. (Previously Presented.) The computer system of claim 92, further
13 comprising means for superimposing the full-screen browser window on the first
14 browser window.

15 94. (Previously Presented.) The computer system of claim 91, further
16 comprising means for opening the second browser window after receiving a load
17 finished event for the first browser window and before receiving an unload event
18 for the first browser window.

19 95. (Previously Presented.) The computer system of claim 91, further
20 comprising means for opening the second browser window in a second browser
21 instance distinct from a first browser instance in which the first browser window is
22 opened.

S/N 09/712,064

Response to Office Action Dated 04/01/2004

1 96. (Previously Presented.) The computer system of claim 95, further
2 comprising means for modifying the content of one of the first and second browser
3 windows in response to an event occurring in one of the first and second browser
4 instances.

5 97. (Previously Presented.) The computer system of claim 91, wherein
6 the first browser window contains a plurality of frames, wherein the request to
7 open a second browser window is associated with one of the plurality of frames,
8 and wherein the computer system further comprises means for opening the second
9 browser window after loading the frame associated with the request to open the
10 second browser window.

11 98. (Previously Presented.) The computer system of claim 97, further
12 comprising means for opening the second browser window after loading all of the
13 frames of the first browser window.

14 99. (Previously Presented.) The computer system of claim 91, further
15 comprising means for suppressing a request to open a dialog box until a browser
16 window associated with the request to open the dialog box is displayed.

17
18 100. (Previously Presented.) The computer system of claim 91, further
19 comprising means for suppressing generation of a sound associated with a browser
20 window that is not displayed.
21
22
23
24
25

S/N 09/712,064

Response to Office Action Dated 04/01/2004

101. (Previously Presented.) The computer system of claim 91, further comprising:

means for receiving a request to close a browser window;

means for closing the browser window if another browser window is open;

and

means for ignoring the request if no other browser window is open.

102. (Previously Presented.) The computer system of claim 91, further comprising means for maintaining, in a browser history, a history of transitions between the first and second browser windows.

103. (Previously Presented.) The computer system of claim 102, further comprising means for building the browser history from a history of a displayed browser window.

104. (Previously Presented.) The computer system of claim 102, further comprising means for building the browser history from histories of a set of simultaneously open browser windows.

105. (Previously Presented.) The computer system of claim 102, further comprising:

means for detecting, in the browser history, a transition between two simultaneously open browser windows; and

means for, in response to the detected transition, hiding one of the first and second browser windows and displaying a different one of the first and second browser windows.

S/N 09/712,064

Response to Office Action Dated 04/01/2004

106. (Previously Presented.) The method of claim 1, additionally comprising:

basing a determination that the request was not in response to user action on information that the request was initiated during either loading or unloading of a page in the first browser window; and

basing a determination that the request was in response to user action on information that the request was initiated after loading and before unloading of a page in the first browser window.

107. (Previously Presented.) The computer-readable media of claim 31, additionally configured to:

base a determination that the request was not in response to user action on information that the request was initiated during either loading or unloading of a page in the first browser window; and

base a determination that the request was in response to user action on information that the request was initiated after loading and before unloading of a page in the first browser window.

108. (Previously Presented.) The computer system of claim 61, wherein the browser module is additionally configured to:

base a determination that the request was not in response to user action on information that the request was initiated during either loading or unloading of a page in the first browser window; and

base a determination that the request was in response to user action on information that the request was initiated after loading and before unloading of a page in the first browser window.

S/N 09/712,064

Response to Office Action Dated 04/01/2004

1
2 109. (Previously Presented.) The computer system of claim 91,
3 additionally comprising:

4 means for basing a determination that the request was not in response to
5 user action on information that the request was initiated during either loading or
6 unloading of a page in the first browser window; and

7 means for basing a determination that the request was in response to user
8 action on information that the request was initiated after loading and before
9 unloading of a page in the first browser window.
